

Hodie P A S S

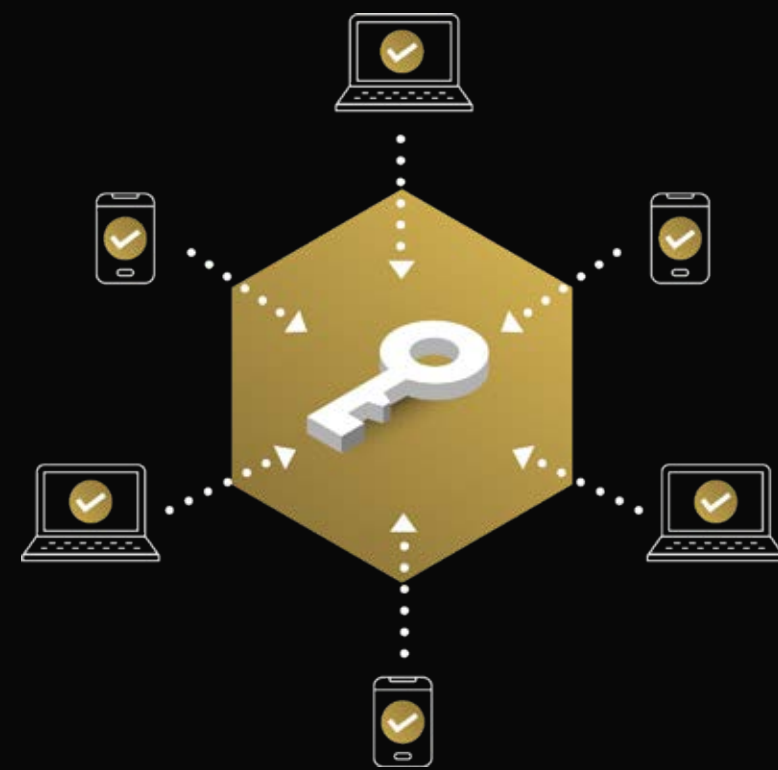

Bitcoin Blockchain Based
Document Certification

Services

1.

DOCUMENT VERIFICATION IN BLOCKCHAIN

HodiePass certifies any digital document on the Bitcoin Blockchain, ensuring maximum privacy. The certification proves the existence and immutability of a digital document, guaranteeing that it cannot be modified afterwards.

Services

2.

NFTS CREATION

HodiePass creates artistic NFTs in Bitcoin or Ethereum Blockchain and transfers them to Wallet or keeps them in the HodiePass Vault. Our NFTs Managers will be able to guide in the artistic definition of NFTs and in the commercial positioning in the HodieNFT marketplace.

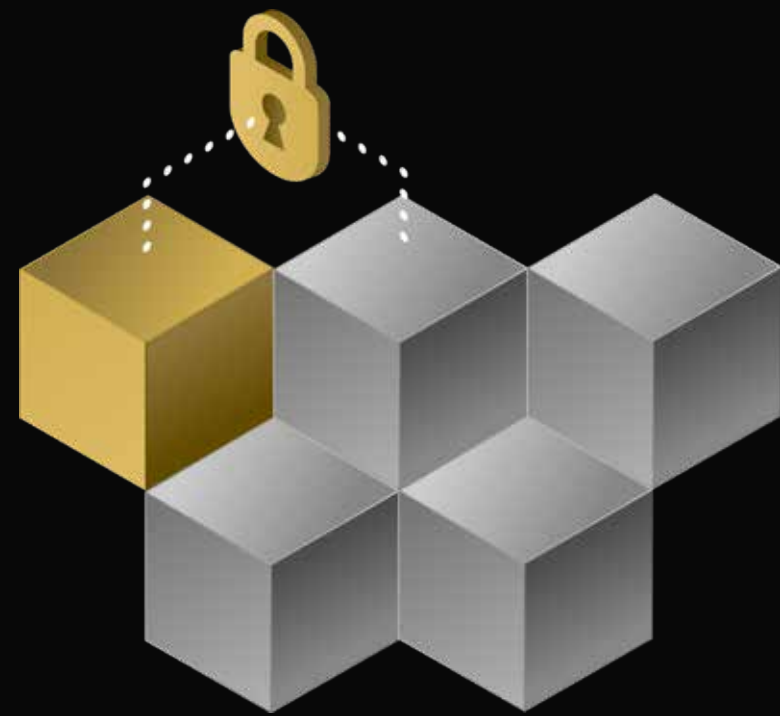

Services

3.

NFTS AUTHENTICATION

HodiePass certifies the existence of NFTs by verifying the hash keys in the origin's blockchain, producing a subsequent certificate, also in the blockchain. Protect your digital assets and guarantee your buyers.

Legal Value

The **EU Regulation n ° 910/2014 – eIDAS**
The blockchain document validation system is a reality and European law has transposed it. Document's registration through the blockchain produces the effects of electronic time stamping, remaining the reversal of the proof's burden to the disputing party. Obviously, the degree of reliability of the blockchain will matter, based on the level of hash rate, and **Bitcoin is the best choice**.

How Bitcoin Blockchain Works

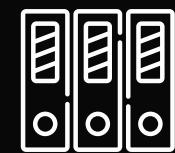

Only Bitcoin is suitable for guaranteeing the immutability of stored data.

Private blockchains are not secure by their very nature, while a public blockchain's security level, permissionless and associated with high hash power, is certain.

The hash rate, or hash power, is the unit of measurement of how much computing power a cryptocurrency needs to remain functional.

Application Area

PUBLIC ADMINISTRATION

Hodie can safely manage the digital public register, including personal data, land registry information, judicial reports, etc. We reduce the times and costs of the Public Administration, introducing decentralized and performing processes.

DOCUMENTATION

Blockchain technology enables the decentralized management of digital archives for documents, contracts, property and assets of the public and private sectors. The data is automatically verified, archived, and made resistant to voluntary or accidental counterfeiting by third parties through algorithmic protocols.

HEALTHCARE

The blockchain is an intelligent solution that allows medical data to be collected, stored, analyzed and cross-referenced for scientific, commercial or medical purposes, with an absolute guarantee of security and without any personal information on patients being revealed, not even to the computational nodes of the platform.

FOOD

Blockchain technology allows to trace the entire supply chain from the raw material to the product on the shelf, with all the information relating to production, transport and related conditions; a real guarantee for the customer.

INDUSTRY

Industrial processes, even in different sectors, need to be traceable, to be part of a chain and to be protected against counterfeiting. Simplify and optimize your business organization with the Blockchain.

ART & COLLECTIBLES

The world of art and collecting are among the fields of application of blockchain certification. Owning an NFT that certifies the existence of a work or certifies its ownership increases the commercial value of the work itself.

Hodie NFT Marketplace

Hodie
it's your time

Hodie NFTs Marketplace is the **first Italian multi-brand platform where you can find the best international NFTs**. The system allows the display of NFTs belonging's categories (sport, fashion, cinema, art, influencer, music ...) and the related **storytelling**. In this new digital era, where the rules still have to be written, Hodie is the warranty of **quality** and **success**.

Case Study

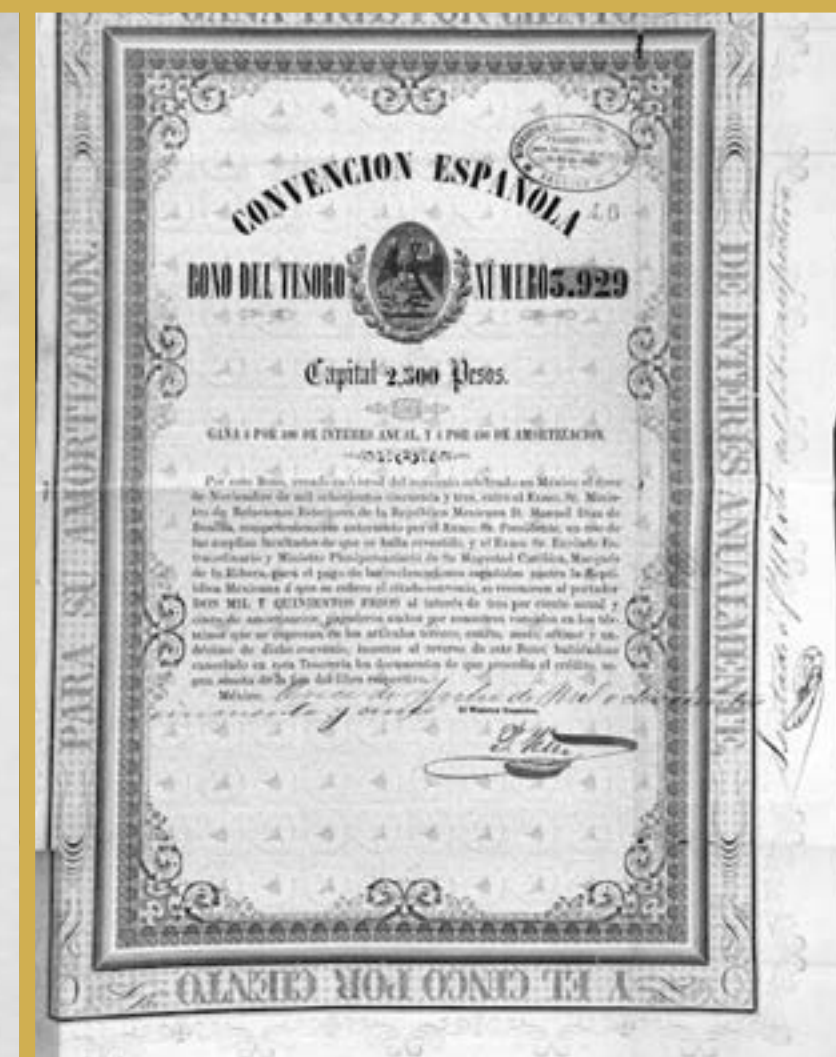

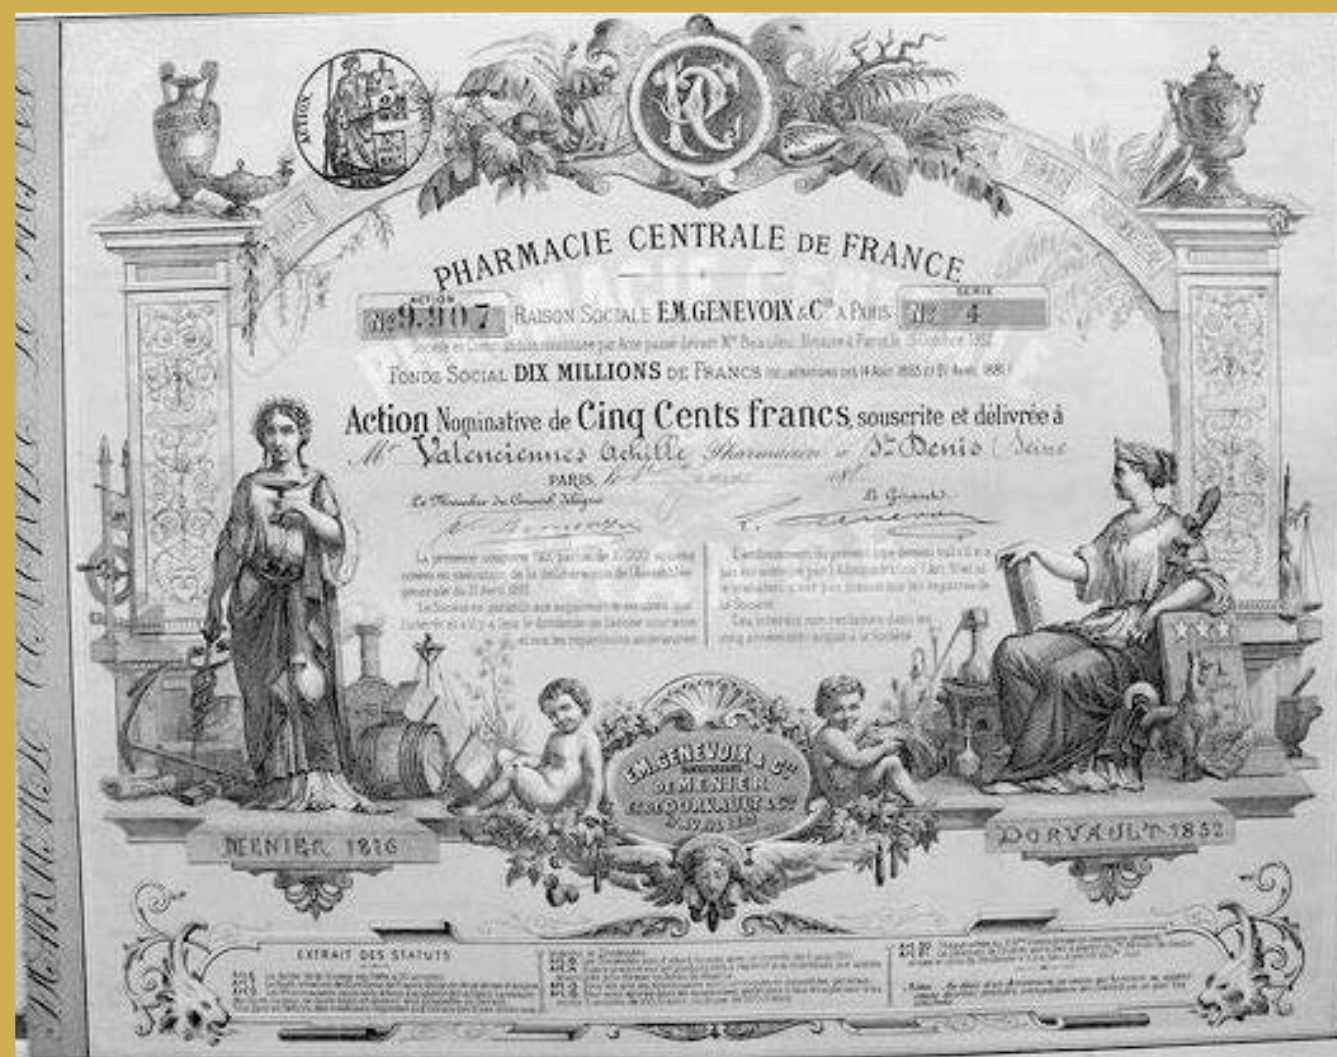

The **Italian Esports Observatory** is the first Italian entity to aggregate all the players involved in developing the Esports market. OIES has chosen HodiePass to **certify its training courses** certificates in Bitcoin Blockchain.

The Concept

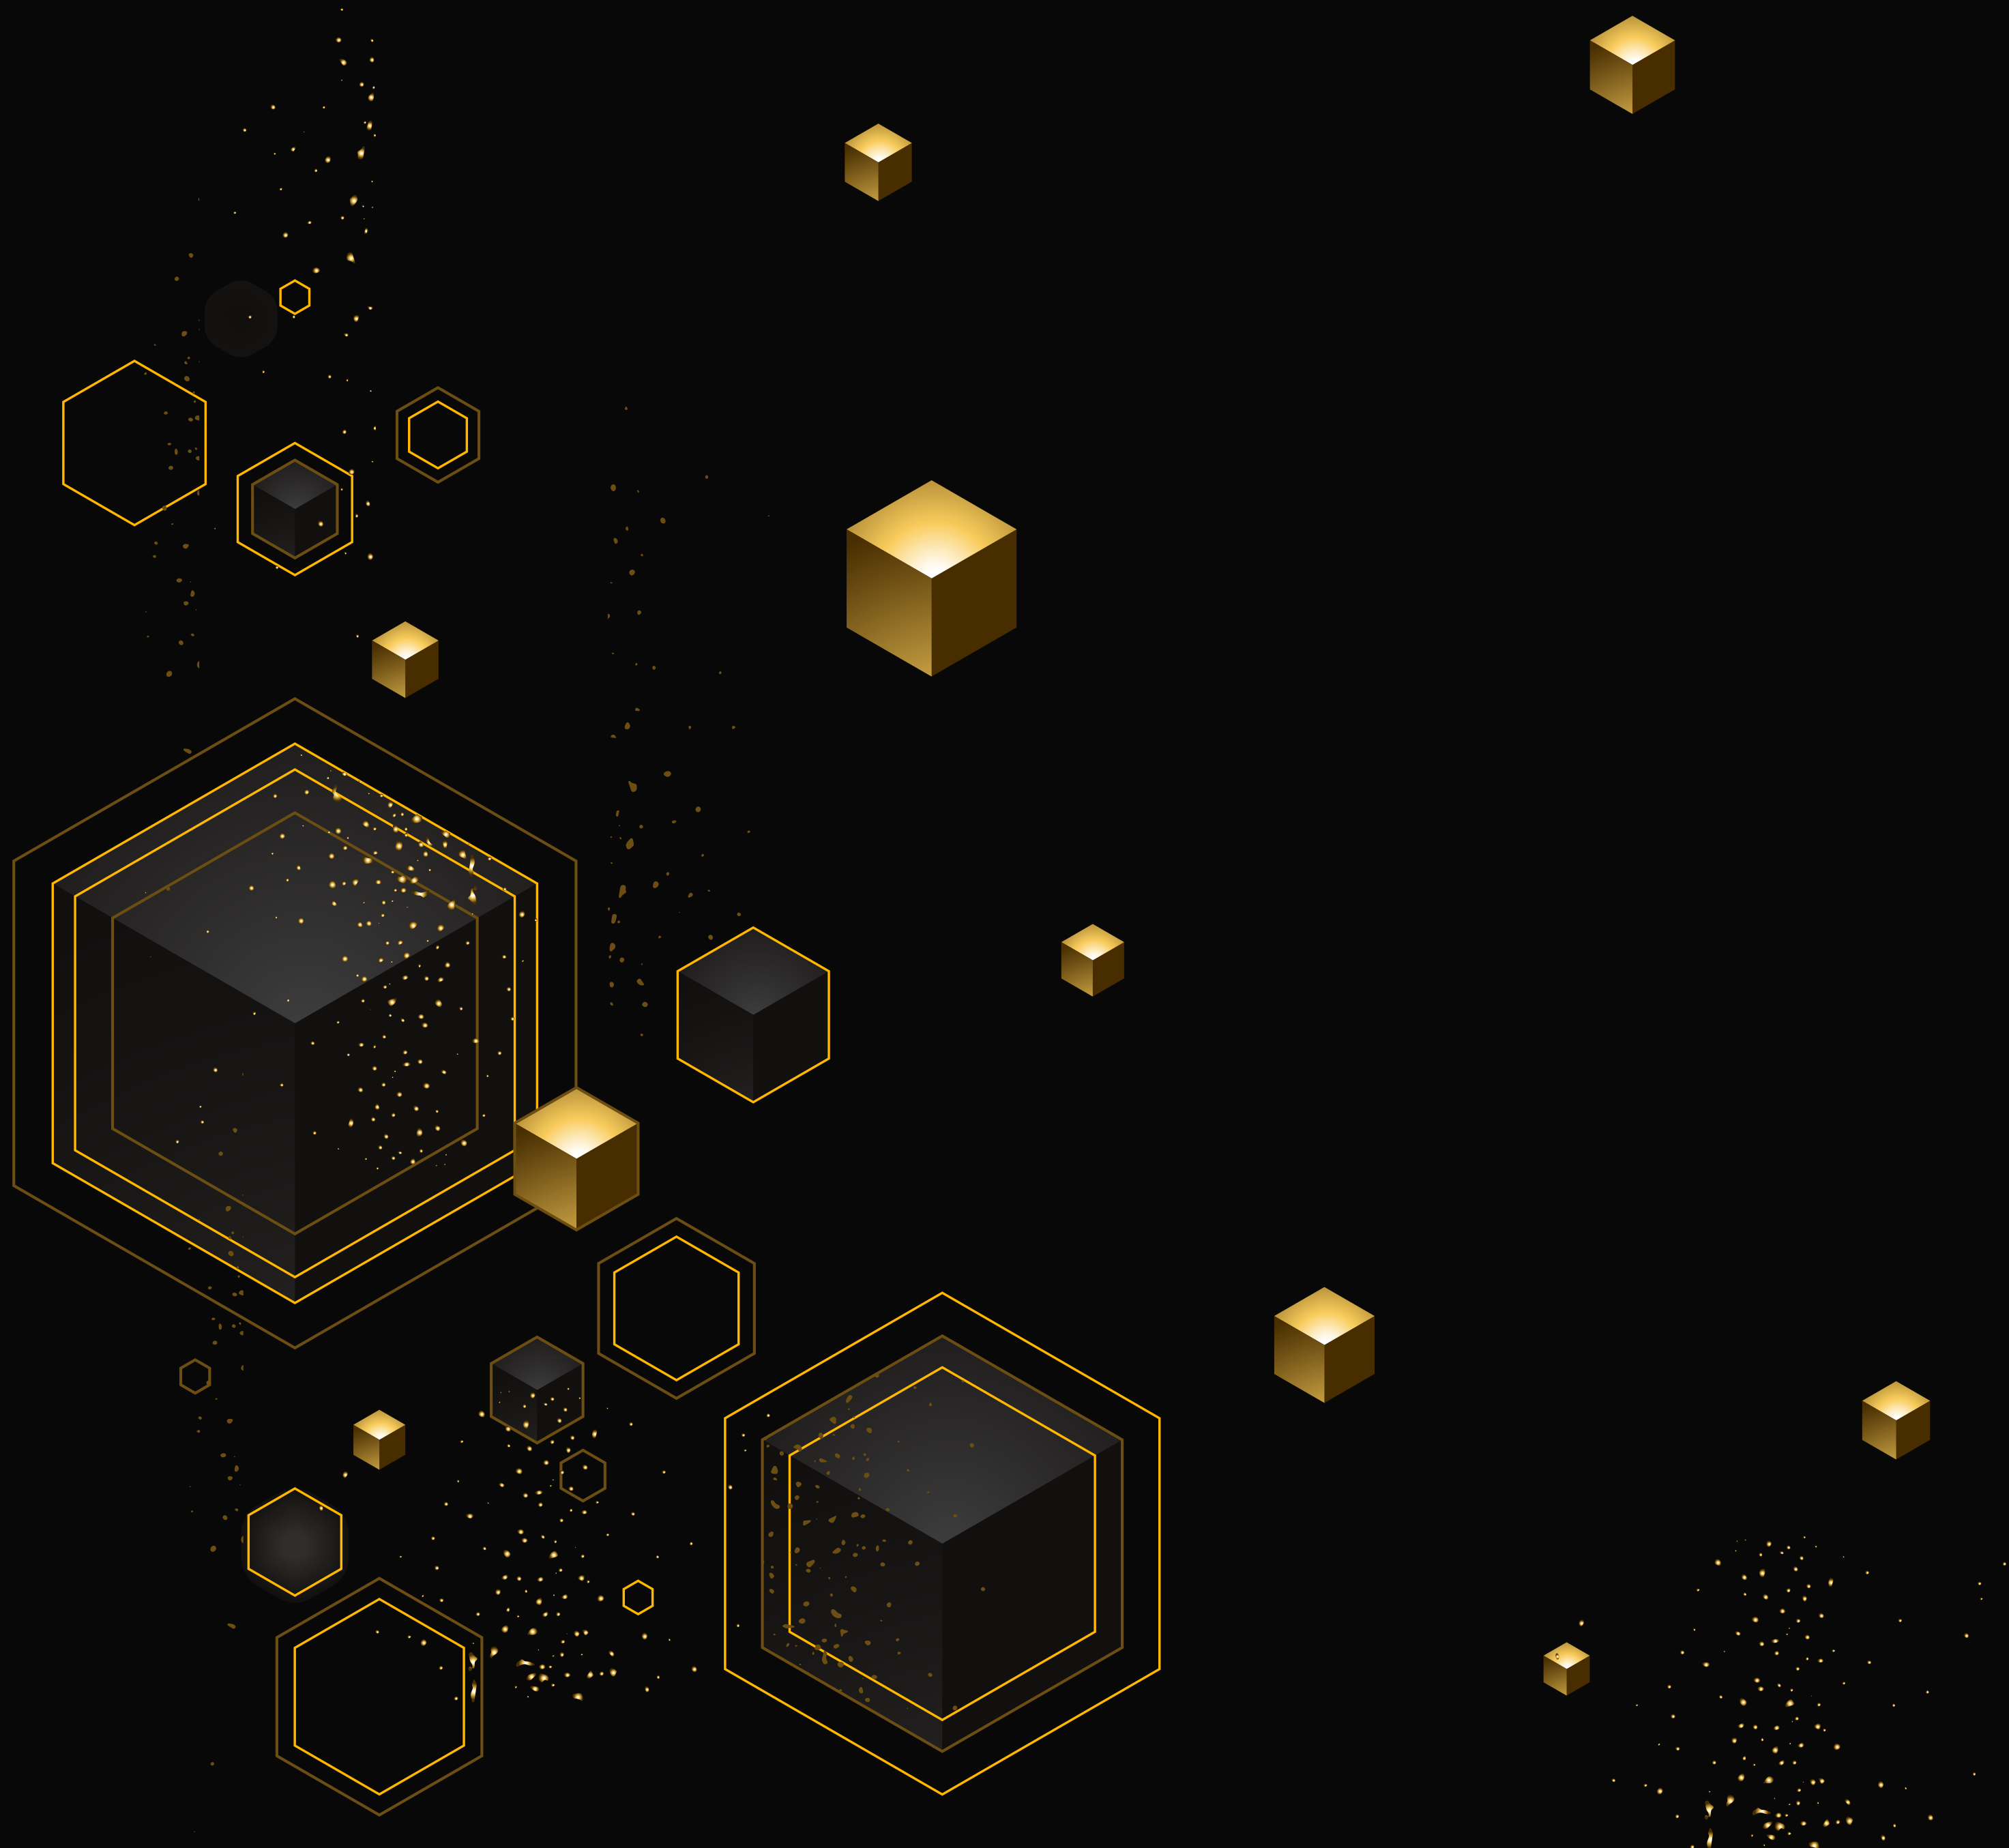

The Legacy of Scripofilia

Scripopass, a brand of Scripo srl, is the Market Maker for the issuance of certifications and evaluations for the sector of the history of finance among stocks, bonds and historical collectible paper money of the world. Scripopass is founded by Alberto Puppo.
